

# User Stories Backlog

## 1. Student sign up:

As a student who is looking for a job, I want to create my account by entering my details. On clicking the sign-up button on the homepage, I can enter details such as Full name, email address and phone number. In this way, the website will check the details and store user data in the database.

## 2. Employee login:

As an employee, I want to login to the application by clicking the login button on the home page and entering Email id and Password. The system then verifies credentials and if valid, I can proceed.

## 3. Students upload portfolio:

As a graduate student who is about to graduate, after creating my account, I want to edit my portfolio to update my information with new skills or project experiences so that employees will see my new abilities and make me more competitive.

## 4. Admin verify job posts:

As a system admin, I want to verify and post each job offer that was added by employees so that students can see the newest job posts and choose to apply.

## 5. Employee post job openings:

As an employee, I want to post my job openings in the public panel with detailed descriptions so that students or job seekers can view on their sides and apply if they are interested.
